Cloud Infrastructure SLA

Operational uptime and support commitments attached to the Northwind managed-service engagement.

Document ID	CTR-012
Owner	Vendor Management Office
Version	1.3
Effective Date	2024-01-15
Customer	Meridian Holdings Ltd.
Counterparty	Northwind Cloud Systems LLC

Synthetic corporate document for demo, evaluation, and retrieval workflows only. All parties, people, systems, repositories, and events are fictional.

1. Service Commitments

Metric	Commitment	Measurement Window
Platform Availability	99.5% monthly uptime	Calendar month
Priority 1 Initial Response	15 minutes, 24×7	Per incident
Priority 2 Initial Response	1 hour, 24×7	Per incident
Priority 3 Initial Response	4 business hours	Per incident
Service Restoration Objective	Best efforts; target based on severity and available workaround	Per incident

2. Severity Definitions and Update Cadence

Severity	Definition	Update Cadence
P1	Complete production outage or material compromise of the managed retrieval service.	Every 60 minutes
P2	Major degradation affecting critical workflows with no practical workaround.	Every 4 hours
P3	Material issue with available workaround or limited business effect.	Daily until stabilization

3. Service Credits

- If monthly availability falls below 99.5% but remains at or above 99.0%, Customer receives a 5% service credit for the affected month.
- If monthly availability falls below 99.0% but remains at or above 98.5%, Customer receives a 10% service credit for the affected month.
- If monthly availability falls below 98.5%, Customer receives a 20% service credit. Service credits are the sole and exclusive remedy for availability failures under this SLA.

4. Remedies and Liability

Clause 4.2 — Liability Cap. Provider's aggregate liability arising out of or related to this SLA shall not exceed the fees paid by Customer for the affected services during the twelve (12) months preceding the event giving rise to the claim.

Clause 4.3 — No Renewal Mechanics. This SLA does not modify contract term, renewal, or non-renewal rights established in the Master Service Agreement.

Clause 4.5 — Reporting. Provider shall deliver a monthly service report that includes availability calculations, incident counts by severity, open corrective actions, and scheduled maintenance windows.

Primary review signal: 99.5% monthly uptime is materially below Meridian's target 99.95% enterprise baseline. This document also provides a capped-liability comparator against the unlimited MSA draft.
