| Subject | Approval — standing privileged access for Northwind support accounts |

Hi team,

Approved for the two named Northwind production-support administrators to retain standing privileged access during the pilot period, provided that:

- access remains scoped to ticketed support and break-fix tasks only;
- all privileged activity continues to feed the Meridian logging pipeline;
- the accounts are reviewed again at the next quarterly access recertification;
- the vendor confirms the named personnel list before each quarter begins.

Please archive this approval with the Q1 access-review evidence pack. If either named administrator changes, this approval must be revalidated before access is retained.

Thanks,  
Priya
