

Master Services Agreement - Approved Baseline

Version 1.0 - customer-approved baseline with security, audit, and data-deletion protections.

Notice: Synthetic business document for demo use only. All names, parties, systems, and events are fictional.

Document ID	CTR-001	Owner	Legal / Procurement
Status	Approved Baseline	Effective Date	2025-08-12
Counterparty	BluePeak Cloud Services LLC	Classification	Confidential

1. Parties and Commercial Context

This approved baseline agreement is between HarborView Analytics, Inc. (Customer) and BluePeak Cloud Services LLC (Provider) for log transport, alert enrichment, and managed analytics support services.

Commercial Term	Approved Position
Term	Initial 24 months, auto-renewing for successive 12-month periods unless either party gives 60 days notice.
Fees	Fixed monthly services fee plus pre-approved professional services at stated hourly rates.
Service Documents	This MSA, applicable Statements of Work, SLA, and DPA. In case of conflict, the DPA prevails for personal-data matters.

2. Key Risk Clauses

Clause	Approved Language Summary
Security incident notice	Provider must notify Customer without undue delay and in no event later than 48 hours after confirming an incident affecting Customer Data or services.
Audit rights	Customer may request annual audit evidence and may conduct a remote control review for material concerns.
Subprocessors	New subprocessors require advance notice and a documented objection process.
Data return/deletion	Provider must return or delete Customer Data within 30 days after termination unless law requires retention.
Liability cap	General cap equal to 2x fees paid in prior 12 months; exclusions for confidentiality, data misuse, and gross negligence.
Termination	Customer may terminate for uncured material breach, repeated SLA failure, or material security non-compliance.

3. Governance Hooks

- Provider must maintain evidence sufficient to support HarborView customer diligence requests.
- Quarterly service reviews must include incident summary, SLA metrics, open corrective actions, and planned control changes.
- A signed DPA and current subprocessor list are required before production data transfer.
