

Data Retention Policy

Version 1.2 - enterprise retention schedule for operational, contractual, and audit records.

Notice: Synthetic business document for demo use only. All names, parties, systems, and events are fictional.

Document ID	POL-003	Owner	General Counsel
Version	1.2	Effective Date	2025-07-01
Review Cycle	Annual	Classification	Internal Use

1. Policy Statement

HarborView Analytics retains business records only for a defined business, legal, contractual, or regulatory purpose. Records must be disposed of in a controlled manner after the retention period expires unless a legal hold or investigation requires preservation.

2. Retention Schedule

Record Type	Minimum Retention	Repository	Owner
Customer contracts and amendments	7 years after termination	Contract repository	Legal
Security logs - production systems	12 months	SIEM archive	Security Engineering
Access review evidence	3 years	Compliance evidence drive	IT Operations
Audit reports and remediation plans	5 years	GRC workspace	Compliance
Incident records	5 years after closure	Incident tracker	Security
Board and committee minutes	7 years	Corporate records archive	Corporate Secretary
Backups containing operational data	35 days rolling unless otherwise approved	Backup platform	Infrastructure

3. Operational Requirements

- No team may create a local retention schedule that conflicts with this policy without Legal approval.
- When records are deleted, deletion must be documented where the record class is subject to audit or contractual review.
- Legal holds suspend ordinary destruction until written release from Legal.
- Evidence used to support external attestations or customer commitments must be stored in the approved evidence repository with naming conventions that permit retrieval.

4. Exceptions

Any exception must identify the record class, rationale, risk, alternative retention period, and approval from the record owner and Legal.
