

Third-Party Supplier Code of Conduct

Version 1.0 - minimum conduct and control expectations for vendors and subcontractors.

Notice: Synthetic business document for demo use only. All names, parties, systems, and events are fictional.

Document ID	POL-004	Owner	VP, Procurement
Version	1.0	Effective Date	2025-06-01
Review Cycle	Annual	Classification	Internal / External

1. Expectations of Suppliers

- Suppliers must comply with applicable laws, anti-bribery requirements, sanctions restrictions, and contractual obligations.
- Suppliers processing HarborView or customer data must maintain security controls proportionate to risk, including access control, logging, vulnerability management, and incident response.
- Suppliers must use sub-processors only as permitted by contract and must remain responsible for their performance and compliance.
- Suppliers must promptly cooperate with investigations, audits, risk reviews, and remediation requests related to HarborView services.

2. Security and Privacy Minimums

Topic	Minimum Expectation
Incident notification	Written notice without undue delay and no later than 48 hours after confirming a security event affecting HarborView or HarborView data.
Access control	Least-privilege access, unique accounts, MFA for privileged users, and periodic recertification of access.
Evidence support	Reasonably requested evidence shall be provided for audits, certifications, and customer due diligence.
Data handling	Customer data used only for contracted purposes and deleted or returned at contract end.
Business continuity	Documented continuity and recovery procedures for critical services.

3. Non-Compliance

HarborView may require corrective action plans, increased monitoring, suspension of data transfers, or termination for material non-compliance with this Code.

This document is designed to serve as both a supplier-governance policy artifact and a reference point for contract review.
